After Warranty Spares always available

Supplied at reasonable prices

SPA POOL FACTS

Insulation

We insulate the Spa Pool Shell only.

Fact: Fully filled cabinets do conserve more heat.

Fact: Fully foamed cabinets are nearly impossible to repair should a fault occur and can result in rot and mould in the insulation.

Fact: Polystyrene foam can loosen pipe work from jets over a period of years due to expansion and contraction.

Fact: Full foaming can be easily compensated for by installing batts or any other insulation material in the Spa cabinet after installation.
